Description Information

Who are you trying to contact? The White House and President Obama

Description Dear Mr. President,

Thank you for the response. To think global and act local in regards to Tremont City Barrel Fill and your content means something more than just dig out, drain, and return sludge with solids with barrels crushed only to be covered by dirt. First, it isn't really remediation. There is no rendering or process to limit the toxicity of long lived hazardous waste. Second, it's not legal – at least in a layman's view of zoning law. Third, Alt 9A has no financial cover – 'in perpetuity' hazardous waste liability insurance - for most of those involved. Waste Management is 49.5% liable by court order. But Chem-Dyne settlement likely applies to the result. It becomes an inseparably mixed waste ooze thus making all – including DOE for Mound & Cresap, WV's Coal Liquifraction – joint & several liable as post clean up funder. Fourth, it wastes a site opportunity for electric generation. We're looking at solar as wind can be too high speed for large units.

I have a team working on item four. It will need EPA, DOE, and RESA working together to amend the ROD. Alternative 4A – complete removal – and Alternative 4B – complete hazardous removal - have waste treatment & no or diminished need for 'in perpetuity' hazardous waste liability insurance. But treatment costs. The Alt. 9A ROD incorrectly omits depreciation and full 'in perpetuity' hazardous waste liability insurance. These are significant cost avoidances. Your Veterans Admin guy came from P&G. They're the big gun left. GM, Delphi, Dana Corp, Corning, Chem-Dyne are all here bankrupt. As is the site which was bought by Waste Management.

Hobson fixed Mound the second time. Neither you nor Bernie were early enough to be aware of the DOE messes left here. For now you have the most access to DOE. Maybe with three Region 5 players no longer involved with Tremont City Barrel Fill, the new team might listen. You have the players for items 1-3. I think I can bring item 4.

Let's fix this.

Do good. Enjoy your day.
